Section A

Background:

The Corrections Industry has found that using video applications appropriately improves security and reduces liability.

Problem Statement:

Contraband (illegal and prohibited substances and items) is being introduced into Miami-Dade County correctional facilities by the visiting public.

Solution:

By reducing or eliminating the public entering into our facilities, a major source of contraband will be eliminated.

Expected Benefits / Direct Payback:

Less contraband in the jails; improved security for the public and correctional employees; reduced travel requirements for Public Defenders and private defense attorneys; enhanced security by reduced inmate movement. In line with the Department's business goals
